116TH CONGRESS 1ST SESSION

Recognizing the duty of the Federal Government to create a Green New Deal.

## IN THE HOUSE OF REPRESENTATIVES

Ms. OCASIO-CORTEZ submitted the following resolution; which was referred to the Committee on

## RESOLUTION

Recognizing the duty of the Federal Government to create a Green New Deal.

Whereas the October 2018 report entitled "Special Report on Global Warming of 1.5°C" by the Intergovernmental Panel on Climate Change and the November 2018 Fourth National Climate Assessment report found that—

(1) human activity is the dominant cause of observed climate change over the past century;

(2) a changing climate is causing sea levels to rise and an increase in wildfires, severe storms, droughts, and other extreme weather events that threaten human life, healthy communities, and critical infrastructure; (3) global warming at or above 2 degrees Celsius beyond preindustrialized levels will cause—

(A) mass migration from the regions most affected by climate change;

(B) more than \$500,000,000,000 in lost annual economic output in the United States by the year 2100;

(C) wildfires that, by 2050, will annually burn at least twice as much forest area in the western United States than was typically burned by wildfires in the years preceding 2019;

(D) a loss of more than 99 percent of all coral reefs on Earth;

(E) more than 350,000,000 more people to be exposed globally to deadly heat stress by 2050; and

(F) a risk of damage to \$1,000,000,000,000 of public infrastructure and coastal real estate in the United States; and

(4) global temperatures must be kept below 1.5 degrees Celsius above preindustrialized levels to avoid the most severe impacts of a changing climate, which will require—

(A) global reductions in greenhouse gas emissions from human sources of 40 to 60 percent from 2010 levels by 2030; and

(B) net-zero emissions by 2050;

Whereas, because the United States has historically been responsible for a disproportionate amount of greenhouse gas emissions, having emitted 20 percent of global greenhouse gas emissions through 2014, and has a high technological capacity, the United States must take a leading role in reducing emissions through economic transformation; Whereas the United States is currently experiencing several related crises, with—

(1) life expectancy declining while basic needs, such as clean air, clean water, healthy food, and adequate health care, housing, transportation, and education, are inaccessible to a significant portion of the United States population;

(2) a 4-decade trend of economic stagnation, deindustrialization, and antilabor policies that has led to—

(A) hourly wages overall stagnating since the 1970s despite increased worker productivity;

(B) the third-worst level of socioeconomic mobility in the developed world before the Great Recession;

(C) the erosion of the earning and bargaining power of workers in the United States; and

(D) inadequate resources for public sector workers to confront the challenges of climate change at local, State, and Federal levels; and

(3) the greatest income inequality since the 1920s, with—

(A) the top 1 percent of earners accruing 91 percent of gains in the first few years of economic recovery after the Great Recession;

(B) a large racial wealth divide amounting to a difference of 20 times more wealth between the average White family and the average Black family; and

(C) a gender earnings gap that results in women earning approximately 80 percent as much as men, at the median;

Whereas climate change, pollution, and environmental destruction have exacerbated systemic racial, regional, social, environmental, and economic injustices (referred to in this preamble as "systemic injustices") by disproportionately affecting indigenous communities, communities of color, migrant communities, deindustrialized communities, depopulated rural communities, the poor, low-income workers, women, the elderly, the unhoused, people with disabilities, and youth (referred to in this preamble as "frontline and vulnerable communities");

Whereas, climate change constitutes a direct threat to the national security of the United States—

(1) by impacting the economic, environmental, and social stability of countries and communities around the world; and

(2) by acting as a threat multiplier;

- Whereas the Federal Government-led mobilizations during World War II and the New Deal created the greatest middle class that the United States has ever seen, but many members of frontline and vulnerable communities were excluded from many of the economic and societal benefits of those mobilizations; and
- Whereas the House of Representatives recognizes that a new national, social, industrial, and economic mobilization on a scale not seen since World War II and the New Deal is a historic opportunity—

(1) to create millions of good, high-wage jobs in the United States;

(2) to provide unprecedented levels of prosperity and economic security for all people of the United States; and

(3) to counteract systemic injustices: Now, therefore, be it

1	Resolved, That it is the sense of the House of Rep-
2	resentatives that—
3	(1) it is the duty of the Federal Government to
4	create a Green New Deal—
5	(A) to achieve net-zero greenhouse gas
6	emissions through a fair and just transition for
7	all communities and workers;
8	(B) to create millions of good, high-wage
9	jobs and ensure prosperity and economic secu-
10	rity for all people of the United States;
11	(C) to invest in the infrastructure and in-
12	dustry of the United States to sustainably meet
13	the challenges of the 21st century;
14	(D) to secure for all people of the United
15	States for generations to come—
16	(i) clean air and water;
17	(ii) climate and community resiliency;
18	(iii) healthy food;
19	(iv) access to nature; and
20	(v) a sustainable environment; and
21	(E) to promote justice and equity by stop-
22	ping current, preventing future, and repairing
23	historic oppression of indigenous communities,
24	communities of color, migrant communities,
25	deindustrialized communities, depopulated rural

communities, the poor, low-income workers,
 women, the elderly, the unhoused, people with
 disabilities, and youth (referred to in this reso lution as "frontline and vulnerable commu nities");

6 (2) the goals described in subparagraphs (A) 7 through (E) of paragraph (1) (referred to in this 8 resolution as the "Green New Deal goals") should 9 be accomplished through a 10-year national mobili-10 zation (referred to in this resolution as the "Green 11 New Deal mobilization") that will require the fol-12 lowing goals and projects—

(A) building resiliency against climate
change-related disasters, such as extreme
weather, including by leveraging funding and
providing investments for community-defined
projects and strategies;

(B) repairing and upgrading the infrastructure in the United States, including—

20 (i) by eliminating pollution and green21 house gas emissions as much as techno22 logically feasible;

23 (ii) by guaranteeing universal access24 to clean water;

1	(iii) by reducing the risks posed by
2	flooding and other climate impacts; and
3	(iv) by ensuring that any infrastruc-
4	ture bill considered by Congress addresses
5	climate change;
6	(C) meeting 100 percent of the power de-
7	mand in the United States through clean, re-
8	newable, and zero-emission energy sources, in-
9	cluding-
10	(i) by dramatically expanding and up-
11	grading existing renewable power sources;
12	and
13	(ii) by deploying new capacity;
14	(D) building or upgrading to energy-effi-
15	cient, distributed, and "smart" power grids,
16	and working to ensure affordable access to elec-
17	tricity;
18	(E) upgrading all existing buildings in the
19	United States and building new buildings to
20	achieve maximal energy efficiency, water effi-
21	ciency, safety, affordability, comfort, and dura-
22	bility, including through electrification;
23	(F) spurring massive growth in clean man-
24	ufacturing in the United States and removing
25	pollution and greenhouse gas emissions from

1	manufacturing and industry as much as is tech-
2	nologically feasible, including by expanding re-
3	newable energy manufacturing and investing in
4	existing manufacturing and industry;
5	(G) working collaboratively with farmers
6	and ranchers in the United States to eliminate
7	pollution and greenhouse gas emissions from
8	the agricultural sector as much as is techno-
9	logically feasible, including—
10	(i) by supporting family farming;
11	(ii) by investing in sustainable farm-
12	ing and land use practices that increase
13	soil health; and
14	(iii) by building a more sustainable
15	food system that ensures universal access
16	to healthy food;
17	(H) overhauling transportation systems in
18	the United States to eliminate pollution and
19	greenhouse gas emissions from the transpor-
20	tation sector as much as is technologically fea-
21	sible, including through investment in—
22	(i) zero-emission vehicle infrastructure
23	and manufacturing;
24	(ii) clean, affordable, and accessible
25	public transportation; and

1	(iii) high-speed rail;
2	(I) mitigating and managing the long-term
3	adverse health, economic, and other effects of
4	pollution and climate change, including by pro-
5	viding funding for community-defined projects
6	and strategies;
7	(J) removing greenhouse gases from the
8	atmosphere and reducing pollution, including by
9	restoring natural ecosystems through proven
10	low-tech solutions that increase soil carbon stor-
11	age, such as preservation and afforestation;
12	(K) restoring and protecting threatened,
13	endangered, and fragile ecosystems through lo-
14	cally appropriate and science-based projects
15	that enhance biodiversity and support climate
16	resiliency;
17	(L) cleaning up existing hazardous waste
18	and abandoned sites to promote economic devel-
19	opment and sustainability;
20	(M) identifying other emission and pollu-
21	tion sources and creating solutions to eliminate
22	them; and
23	(N) promoting the international exchange
24	of technology, expertise, products, funding, and
25	services, with the aim of making the United

1	States the international leader on climate ac-
2	tion, and to help other countries achieve a
3	Green New Deal;
4	(3) a Green New Deal must be developed
5	through transparent and inclusive consultation, col-
6	laboration, and partnership with frontline and vul-
7	nerable communities, labor unions, worker coopera-
8	tives, civil society groups, academia, and businesses;
9	and
10	(4) to achieve the Green New Deal goals and
11	mobilization, a Green New Deal will require the fol-
12	lowing goals and projects—
13	(A) providing and leveraging, in a way that
14	ensures that the public receives appropriate
15	ownership stakes and returns on investment,
16	adequate capital (including through community
17	grants, public banks, and other public financ-
18	ing), technical expertise, supporting policies,
19	and other forms of assistance to communities,
20	organizations, Federal, State, and local govern-
21	ment agencies, and businesses working on the
22	Green New Deal mobilization;
23	(B) ensuring that the Federal Government
24	takes into account the complete environmental

1	and social costs and impacts of emissions
2	through—
3	(i) existing laws;
4	(ii) new policies and programs; and
5	(iii) ensuring that frontline and vul-
6	nerable communities shall not be adversely
7	affected;
8	(C) providing resources, training, and
9	high-quality education, including higher edu-
10	cation, to all people of the United States, with
11	a focus on frontline and vulnerable commu-
12	nities, so those communities may be full and
13	equal participants in the Green New Deal mobi-
14	lization;
15	(D) making public investments in the re-
16	search and development of new clean and re-
17	newable energy technologies and industries;
18	(E) directing investments to spur economic
19	development, deepen and diversify industry in
20	local and regional economies, and build wealth
21	and community ownership, while prioritizing
22	high-quality job creation and economic, social,
23	and environmental benefits in frontline and vul-
24	nerable communities that may otherwise strug-

gle with the transition away from greenhouse gas intensive industries;

(F) ensuring the use of democratic and participatory processes that are inclusive of and led by frontline and vulnerable communities and workers to plan, implement, and administer the Green New Deal mobilization at the local level;

8 (G) ensuring that the Green New Deal mo-9 bilization creates high-quality union jobs that 10 pay prevailing wages, hires local workers, offers 11 training and advancement opportunities, and 12 guarantees wage and benefit parity for workers 13 affected by the transition;

(H) guaranteeing a job with a family-sustaining wage, adequate family and medical
leave, paid vacations, and retirement security to
all people of the United States;

(I) strengthening and protecting the right
of all workers to organize, unionize, and collectively bargain free of coercion, intimidation, and
harassment;

(J) strengthening and enforcing labor,
workplace health and safety, antidiscrimination,
and wage and hour standards across all employers, industries, and sectors;

1	(K) enacting and enforcing trade rules,
2	procurement standards, and border adjustments
3	with strong labor and environmental protec-
4	tions-
5	(i) to stop the transfer of jobs and
6	pollution overseas; and
7	(ii) to grow domestic manufacturing
8	in the United States;
9	(L) ensuring that public lands, waters, and
10	oceans are protected and that eminent domain
11	is not abused;
12	(M) obtaining the free, prior, and informed
13	consent of indigenous people for all decisions
14	that affect indigenous people and their tradi-
15	tional territories, honoring all treaties and
16	agreements with indigenous people, and pro-
17	tecting and enforcing the sovereignty and land
18	rights of indigenous people;
19	(N) ensuring a commercial environment
20	where every businessperson is free from unfair
21	competition and domination by domestic or
22	international monopolies; and
23	(O) providing all people of the United
24	States with—
25	(i) high-quality health care;

1	(ii) affordable, safe, and adequate
2	housing;
3	(iii) economic security; and
4	(iv) access to clean water, clean air,
5	healthy and affordable food, and nature.
